Section I Disclosures

See the Dell Pro Docks eGuide for more information on our entire docking portfolio.

*Notebook configurations requiring >100W power may need to be plugged in externally for optimal performance, when used with Dell Pro Dock WD25 with 100W power delivery. For the best experience with such notebook configurations, choose from Dell Pro Smart Dock SD25, Dell Pro Dock WD25Z, Dell Pro Thunderbolt 4 Smart Dock SD25TB4, Dell Pro Thunderbolt 4 Dock WD25TB4, Dell Pro Thunderbolt 5 Smart Dock SD25TB5, Dell Pro Thunderbolt 5 Dock WD25TB5 based on the notebook's power requirement and compatibility, so you no longer need an additional power adapter.

¹ These Precision and Dell Pro Max mobile workstations have configurations that require more than 130W power. When docked with the Dell Pro Dock WD25, Dell Pro Smart Dock SD25, Dell Pro Dock WD25Z, Dell Pro Thunderbolt 4 Smart Dock SD25TB4 or Dell Pro Thunderbolt 4 Dock WD25TB4, these workstations need to be plugged in externally for optimal operation.

² The dock will function with these Chrome notebooks, but with certain limitations: Dock's power button will not sync with the notebook's power button; No Wake on LAN; No port disablement

³ The dock, when used with these Qualcomm Notebooks, can support 2 displays via the docks. A 3rd display can be connected directly to the Notebook

⁴ These Precisions do not support Extended Power Range and can only accept 130W when docked with Dell Pro Thunderbolt 5 Smart Dock SD25TB5 or Dell Pro Thunderbolt 5 Dock WD25TB5. These workstations need to be plugged in externally for optimal operation

Note: When connected to non-Thunderbolt systems, the Dell Pro Thunderbolt 4 Smart Dock SD25TB4, Dell Pro Thunderbolt 4 Dock WD25TB4, Dell Pro Thunderbolt 5 Smart Dock SD25TB5, Dell Pro Thunderbolt 5 Dock WD25TB5 will not retain its Thunderbolt functionality

When connected to Thunderbolt 4 systems, the Dell Pro Thunderbolt 5 Smart Dock SD25TB5 or Dell Pro Thunderbolt 5 Dock WD25TB5 will operate at Thunderbolt 4 capability

Notebook configurations with Intel Lunar Lake processor are limited to 3 external displays supported via the dock

Section II Disclosures

See the Dell Commercial Docks eGuide for more information on our entire docking portfolio.

*Notebook configurations requiring >90W power may need to be plugged in externally for optimal performance, when used with Dell Dock WD19 / WD19S with 90W power delivery, Dell Universal Dock UD22 or Dell Dual Charge Dock HD22Q. For the best experience with such notebook configurations, choose from Dell Dock WD19/WD19S (180W), Dell Performance Dock WD19DC / WD19DCS, Dell Thunderbolt Dock WD19TB/WD19TBS or Dell Thunderbolt 4 Dock WD22TB4 based on the notebook's power requirement and compatibility, so you no longer need an additional power adapter.

** These Inspiron notebooks have higher power requirements than the Dell Universal Dock UD22 or Dell Dual Charge Dock HD22Q can deliver. These docks are functionally compatible but if they are used, the notebook's power adapter needs to be plugged in externally for optimal performance.

¹ These notebooks should be connected to the Dell Performance Dock WD19DC / WD19DCS via a single USB-C connector. The functionality will be reduced to single USB-C, same as the Dell Dock WD19 / WD19S. Connecting both USB-C cables simultaneously may result in unexpected behavior

² These Precision mobile workstations have configurations that require more than 130W power. When docked with the Dell Dock WD19 / WD19S, Dell Thunderbolt Dock WD19TB / WD19TBS or Dell Thunderbolt 4 Dock WD22TB4, the workstations need to be plugged in externally for optimal operation. For the best experience, choose the Dell Performance Dock WD19DC / WD19DCS that comes with a dual USB-C connector and provides up to 210W of power delivery, so you no longer need an additional power adapter.

³ Older Thunderbolt systems have partial compatibility with Dell Thunderbolt 4 Dock WD22TB4. Only one of the ports on the Thunderbolt module will function as Thunderbolt, the other will only work as USB/DP.

⁴ Latitude Chromebook Enterprise notebooks are USB-C systems and the recommended dock is the Dell Dock WD19 / WD19S with 90W power delivery. The Dell Thunderbolt Dock WD19TB / WD19TBS, Dell Thunderbolt 4 Dock WD22TB4 and Dell Performance Dock WD19DC / WD19DCS are supported but functionality is reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.

⁵ The dock's power button will not sync with the notebook's power button. The power button sync is not supported on Inspiron/Vostro AMD platforms, but users can still use Power button on the laptop to power on/off the system and all the other functions are supported.

⁶ The dock will function with these Chrome notebooks, but with certain limitations: Dock's power button will not sync with the notebook's power button; No Wake on LAN; No port disablement

⁷ The dock, when used with these Qualcomm Notebooks, can support 2 displays via the docks. A 3rd display can be connected directly to the Notebook

⁸ Only the notebook configuration with RPL-R processor can support display through their USB-C ports

⁹ These mobile workstation configurations requiring 165W power, when docked with the Dell Dock WD19 / WD19S, Dell Thunderbolt Dock WD19TB / WD19TBS or Dell Thunderbolt 4 Dock WD22TB4, need to be plugged in externally for optimal operation. For the best experience, choose the Dell Performance Dock WD19DC / WD19DCS, that provides up to 210W of power via dual USB-C connector, so you no longer need an additional power adapter.

Configurations requiring 280W power need to be plugged in externally for optimal operation even when docked with Dell Performance Dock WD19DC / WD19DCS.

Note: When connected to non-Thunderbolt systems, the Dell Thunderbolt Dock WD19TB / WD19TBS and Dell Thunderbolt 4 Dock WD22TB4 will not retain its Thunderbolt functionality.

Notebook configurations with Intel Lunar Lake processor are limited to 3 external displays supported via the dock
