# TechClick Dicker Data OnPoint

Presented by: Luke Taylor | Head of Sales | July 2025

# TechClick is about partnerships

We empower resellers to grow their businesses by delivering game-changing technology to their customers.

We provide Microsoft services exclusively through partners, with the express goal of **uplifting** their customers' digital estates and **future-proofing** their Microsoft investment.

**Delivery Model** 

Level up your client's digital estate

Future-proof their investment

- Pre-packaged, templated audits, assessments and deployments
- Custom solutions to meet specific business challenges.
- Team augmentation or full project delivery.

- Leverage Microsoft project funding.
- Rapidly migrate your clients to new technologies.
- Consult on best practice and modern adoption strategies.

- Fully leverage entitlements from recurring licence models.
- Establish ongoing data governance, post migration.
- Harmonise third party solutions to Microsoft offerings.

# **Seriously** Certified

We hold 4 Advanced Specialisations – covering the most important and current engagements.

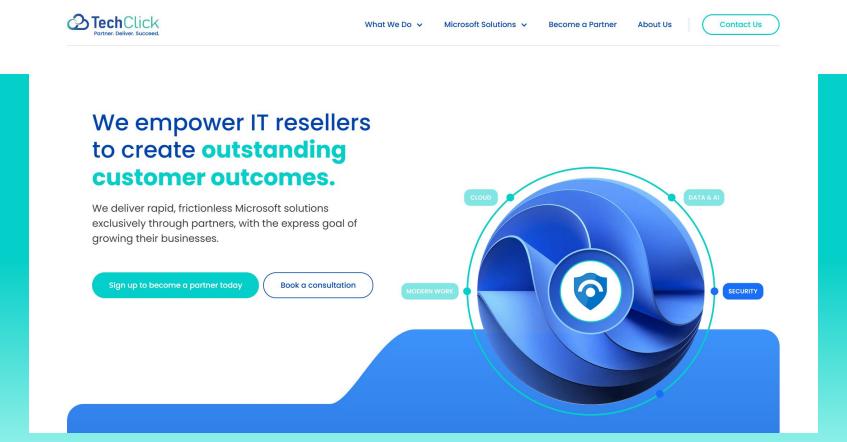

# **Content** and collateral

# **Portfolio** Overview

# **CLOUD:**

- Migration
- Remote Work
- Application Modernisation

# **DATA & AI:**

- Analytics & Reporting
- Copilot
- Azure Al Foundry

# **MODERN WORK:**

- Collaboration
- Automation
- **Device Mgmt**

# **SECURITY:**

- Data Governance
- Threat Protection
- Security Operations
- **Security Governance**

# Azure Assessment and Migration

Help your customers embrace the future of infrastructure with Azure migrations. Assist them with their strategy towards operational excellence and innovation. Transition seamlessly from on-premise, Google Cloud Platform or AWS to Azure. Experience enhanced scalability, reliability, advanced analytics, Al capabilities and robust security features. Let Azure be your foundation for unprecedented growth.

# **Target Audience**

- Using on-premise / data centre infrastructure.
- Using GCP, AWS, Oracle Cloud.
- Existing Azure tenant looking to grow.

## **Customer Benefit**

- Lower total cost of ownership.
- Simplified operational environment.
- Launching pad to future development

## **Partner Benefit**

- Lower operational and management overheads.
- Innovation platform.
- Vendor consolidation

# **Engagement Outcome**

- Assessments identify accurate ongoing Azure costs, migration timeframes and costs, and uncover further funding options.
- Migrations unlock the power and scale of Azure's secure and highly available infrastructure upon which to innovate further.

# **Licence Requirements**

• N/A

## **TechClick Costs**

- Assessments \$5k.
- Migrations \$5k-100k.
- ❖Funding available for qualified customers.

# **Purview** Data Governance

Microsoft Purview provides a unified data governance solution to help manage and govern on-premises, multi cloud, and software as a service (SaaS) data. Easily created, Microsoft Purview provides a holistic and up-to-date map of your data landscape with automated data discovery, sensitive data classification, insider threat detection and end-to-end data lineage

# **Target Audience**

- Currently interested in implementing Copilot.
- Migrating data to SharePoint Online & OneDrive.
- High data security requirements.

## **Customer Benefit**

- Increased security and data management.
- Compliance reporting and insights.

### **Partner Benefit**

- Microsoft Licencing Uplift.
- Greater customer insight and engagement.

# **Engagement Outcome**

- · Centralised controls.
- Auditing & Governance controls over data.
- Document classification.

# **Licence Requirements**

- Business Premium.
- Enterprise E5.

## **TechClick Costs**

- Business Premium \$10k.
- Enterprise E5 \$20K.

# Fabric Assessment and POC

Microsoft Fabric represents
a transformative approach to
data management, enabling
businesses to harness the power
of their data more effectively. By
aligning with the "Azure Innovate
Partner-led: Analytics" POV program,
we can offer a very strong go to
market strategy that not only
streamlines data integration, but
also provides substantial support
for proof of concept (POC) and
migration initiatives.

# **Target Audience**

- Currently using Snowflake or Databricks.
- Using on premises SSIS or SSRS for reporting.
- Multiple independent systems without centralised reporting.

## **Customer Benefit**

- Increased security and data management.
- Reduced complexity and BAU requirements.
- Increased agility to address reporting needs.
- Real time analytics.

### **Partner Benefit**

- Microsoft Licencing Uplift.
- Vendor consolidation.

# **Engagement Outcome**

- Cloud native reporting.
- Streamlined data and analytics.
- Simplification in licencing.
- Increased security controls.

# **Licence Requirements**

- Business Premium.
- Enterprise E5.

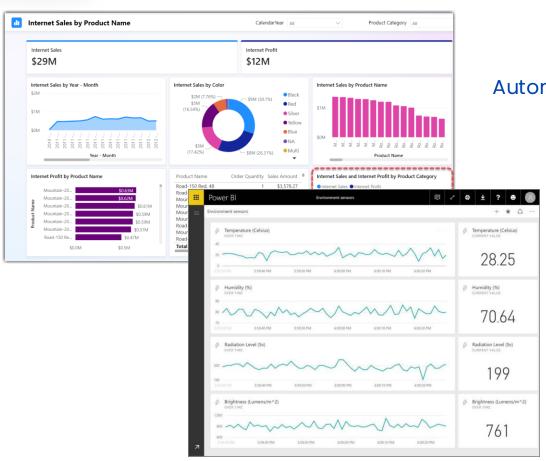

## **TechClick Costs**

- POC \$10k
- Migrations \$10k-100k
- Funding available for qualified customers.

# Fabric M365 for Data

Automate reporting – be right, be informed, all the time

Real Time Analytics – for when you can wait for the report!

# Cutting edge Al with Copilot

The Microsoft Copilot Assessment
Workshop is a comprehensive
program designed to provide
organisations with a detailed
understanding of the capabilities,
security considerations and
adoption process required to
evaluate and implement Microsoft
Copilot within their environment

# **Target Audience**

- Clients interested in exploring how to adopt AI.
- Organisations seeking to automate repeatable functions.

## **Customer Benefit**

- Greater document control.
- Easily control publishing of important and current internal news.
- Included in their M365 licensing.

### **Partner Benefit**

- Lead AI conversations with your customers.
- Drive security and data governance initiatives.
- Insight on key customer business drivers.

# **Engagement Outcome**

- Personalised Copilot adoption roadmap.
- Firm understanding of Copilot's use case for your organisation.
- Simple, yet detailed report on security recommendations.

# **Licence Requirements**

Copilot for M365.

# **TechClick Costs**

- Copilot Assessment \$5k
- Custom Build \$TBA

# The right **Copilot** for the right **job**

Copilot for Microsoft 365		Copilot Studio		Azure Al Foundry
<b>\</b>		<b>+</b>		<b>—</b>
Summarize content		Custom business assistants		Custom LLM development
Draft text	$\rightarrow$	→ Automated workfiows	$\rightarrow$	Al-powered applications
Manage email	$\rightarrow$	Natural language queries	$\rightarrow$	Knowledge mining
Generate presentattions	$\rightarrow$	Internal knowledge bots	$\rightarrow$	Secure Al pipelines
Take meeting notes	$\rightarrow$	Multichannel support	$\rightarrow$	Multimodal Al

# Intranet & Data Repository with **SharePoint**

SharePoint RapidStart is a solution designed to create a modern digital workplace that is easy to use and empowers users to get more done. It takes the guesswork out of where to get started and provides a transformative solution engineered to swiftly establish a modern digital workplace without complexity, utilising SharePoint Online and Microsoft Teams.

# **Target Audience**

- Using custom intranet
- Seeking to better communicate organisation-wide
- Multiple, fractured, document stores – shared drives, local hard drives, email, etc

## **Customer Benefit**

- Increased security and data management.
- Reduced complexity and BAU requirements.
- Increased agility to address reporting needs.
- Real time analytics.

### **Partner Benefit**

- Deeper engagement into your customers day to day operations.
- Drives Purview and Collaboration initiatives.

# **Engagement Outcome**

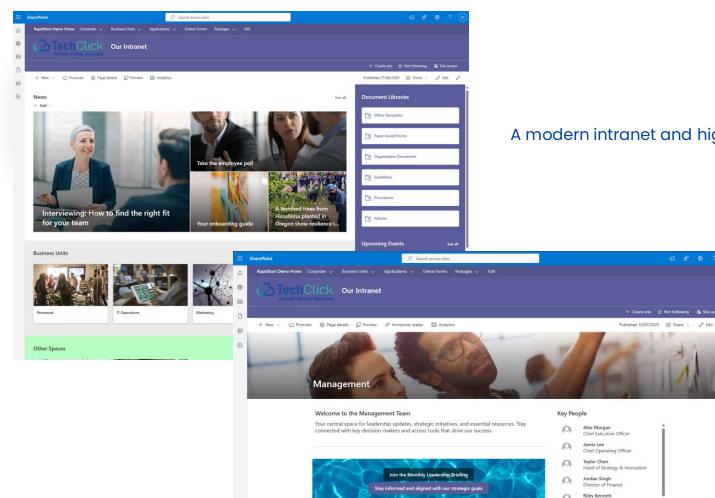

- Tailored intranet built on standard Microsoft code.
- Reduced data sprawl.

# **Licence Requirements**

• Business Premium or above.

### **TechClick Costs**

- Custom Consult \$5k.
- RapidStart Template \$10-25k.

Key Services

Key Documentation

A modern intranet and highly flexible information repository

SharePoint is now the primary citation source for Copilot

# Modern Endpoint Management with **Intune**

Microsoft Intune is a cloud-based unified endpoint management platform that helps organisations manage and secure their devices, apps, and data. It allows IT administrators to manage devices across various operating systems, including Windows, Android, macOS, iOS, and Linux. Intune provides a comprehensive solution for device management, including setting up device configurations, managing updates, and ensuring compliance with company policies and security standards.

# **Target Audience**

- Currently using Windows 10.
- Using on premise Group Policy or SCCM.
- High data security requirements.

# **Customer Benefit**

- Modern approach to device management.
- Cloud native management.
- Simplified technology stack.

### **Partner Benefit**

- Microsoft licensing uplift.
- Simplified management solution.

## **Engagement Outcome**

- Cloud management for devices.
- Removes need for Group Policy and Domain controllers.
- Automated patching and app deployment.
- Specific security controls.

# **Licence Requirements**

• Business Premium or above.

### **TechClick Costs**

• ~\$15k

# Maturing Market Customer Curiosity

- We're seeing a shift from curiosity to capability. Customers are no longer asking "what is Copilot?" but "how do I apply it to my business workflows?"
- Fabric is gaining traction as organisations seek to unify fragmented data estates and reduce reliance on legacy tools like Snowflake
- SharePoint is evolving into a central AI-ready content platform, with Copilot and SharePoint Embedded enabling intelligent document workflows

# Copilot From Hype to Hands-On

# **Readiness is Everything**

- Many customers are hesitant to adopt Copilot due to:

  - Poor data governance foundations. Unclear ROI vs. cost (\$600/user/year).
  - Comparisons to cheaper tools like ChatGPT.

# **Real-World Scenarios**

- Automating proposal generation, onboarding workflows, and contract reviews.
- Using Copilot in SharePoint to summarise documents, generate intranet content, and streamline approvals.

# **Our Approach**

- Deliver structured Copilot Readiness Assessments, including:
  - Workshops on use case discovery and licensing implications.
  - Security and compliance posture reviews.
  - Final reports with actionable recommendations.

# Fabric The Analytics Backbone

# **Key Use Cases**

- Fabric simplifies data integration, governance, and analytics under one roof.
- Internal reporting, publishing customer reports, real time intelligence and advanced insights.

# **Security and Governance**

Fabric integrates natively with Purview for data lineage, classification, and access control.

# **Engagement Modes**

- Discovery, PoC's and implementation engagements aligned with Azure Innovate programs.
- Target customers migrating from Snowflake, Databricks, or on-prem SSIS.

# SharePoint The Al-Ready Content Hub

SharePoint is now the *primary citation source* for Copilot.

# **New features include:**

- SharePoint Agents for scoped knowledge delivery.
- Al-based metadata autofill and streamlined eSignature workflows.

# **Rapid Start Programs**

- Offer pre-built intranet packages to accelerate SharePoint adoption.
- Bundle with Purview for governance and Copilot for productivity.

# Purview Foundation for Secure Al Adoption

- Microsoft's enabler for Governance, Risk and Compliance initiatives.
- Purview is not just a compliance tool—it's the enabler for secure, scalable AI and analytics adoption. Key capabilities include:
  - Unified data classification across M365, Azure, and SaaS.
  - Real-time policy enforcement and insider risk detection.
  - End-to-end data lineage and automated discovery.
- Use Compliance Manager to assess readiness for Copilot and Fabric.
- Deploy Data Security Checks to identify risks in M365 environments and recommend mitigation strategies.
- Leverage Purview to enforce document classification and retention policies across SharePoint and OneDrive.

# Final Thoughts

Copilot is ready, are you?

• Fabric is a **platform for innovation**.

• SharePoint is your **secure knowledge centre**.

Purview is the trust layer for all Microsoft 365 engagement.
