

# Introduction to Microsoft Azure

June 2022

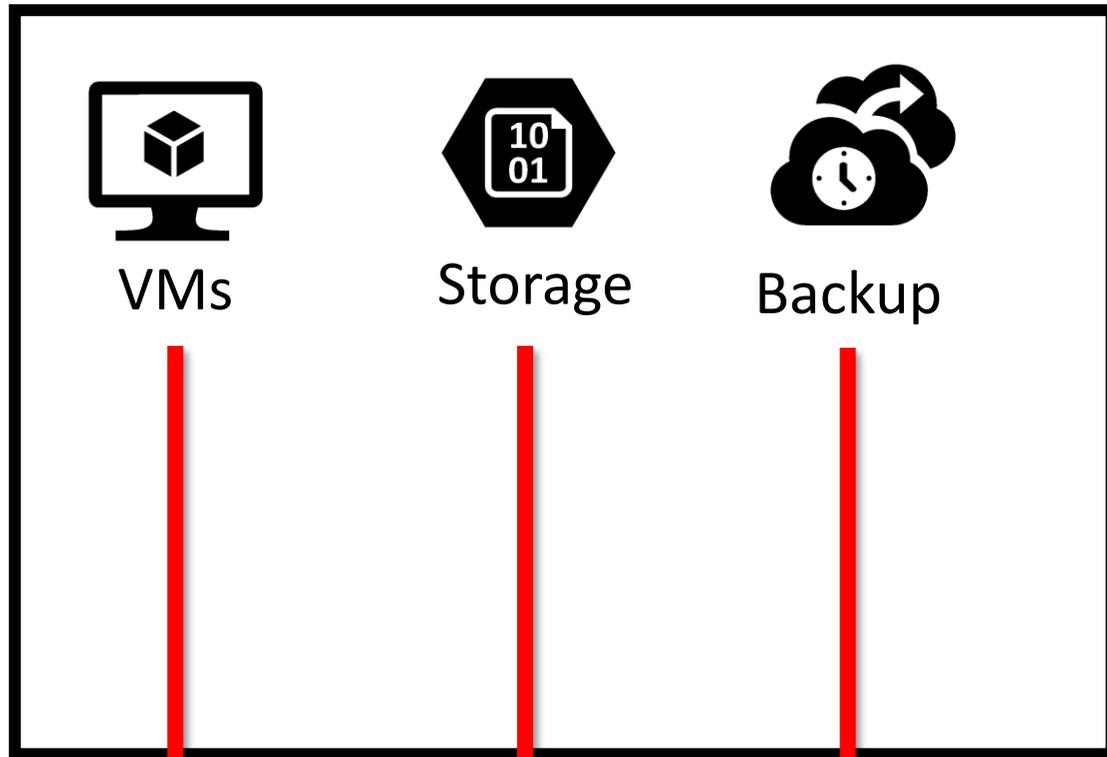

@directorcia

<http://about.me/ciaops>

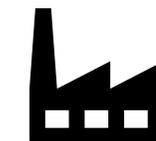

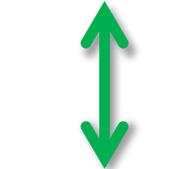

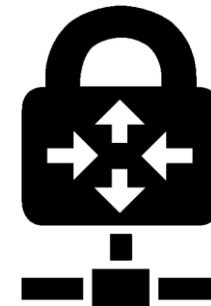

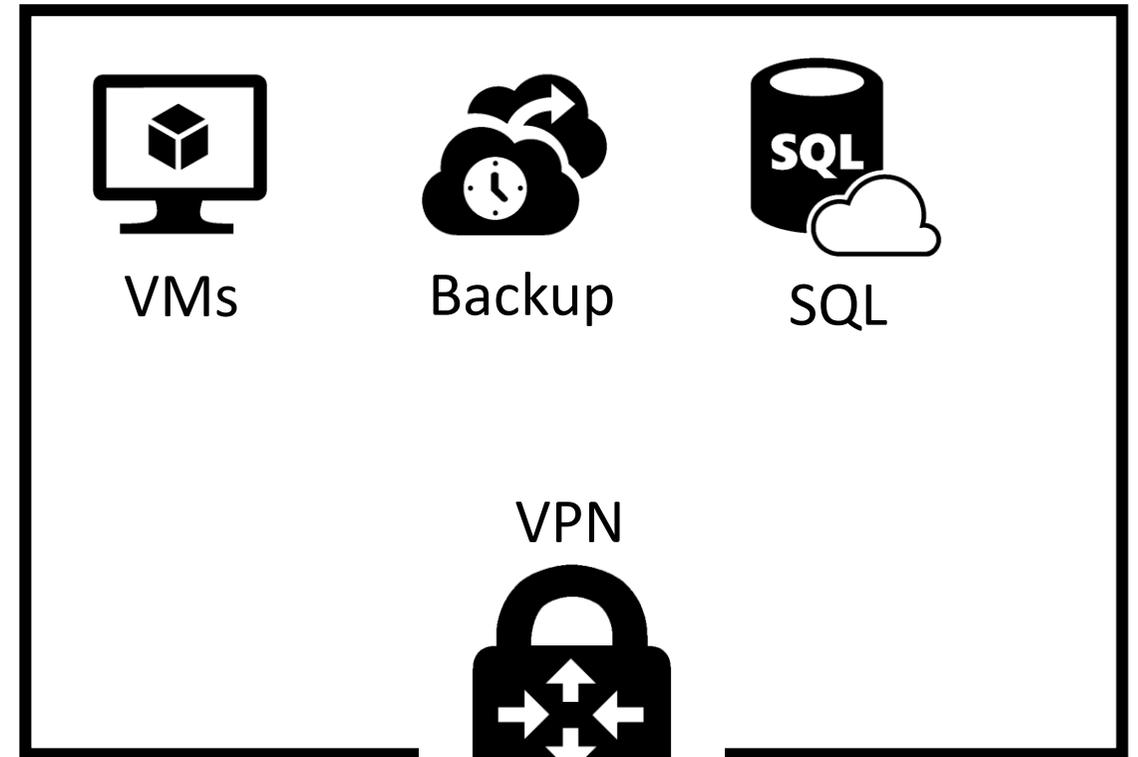

What is Azure?

Your on demand data  
centre

## Reseller Azure

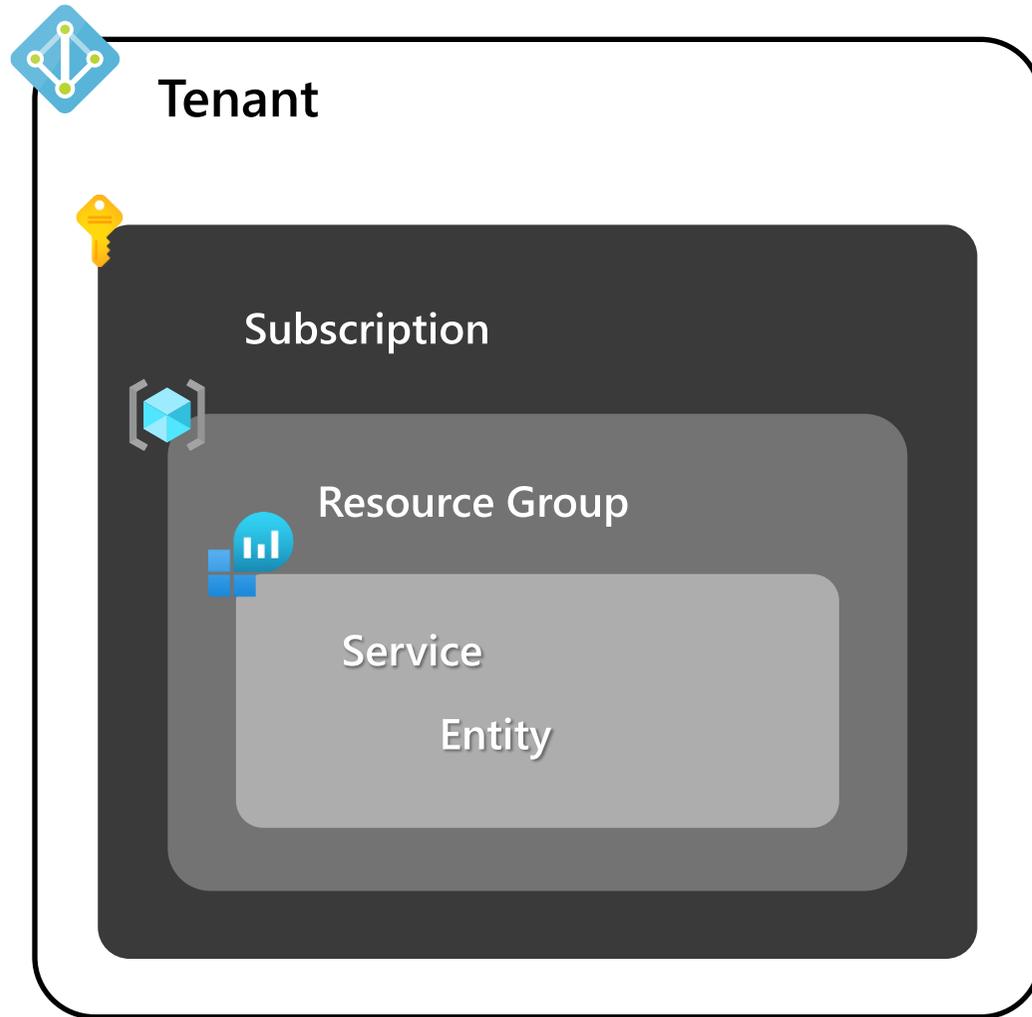

## Customer Azure

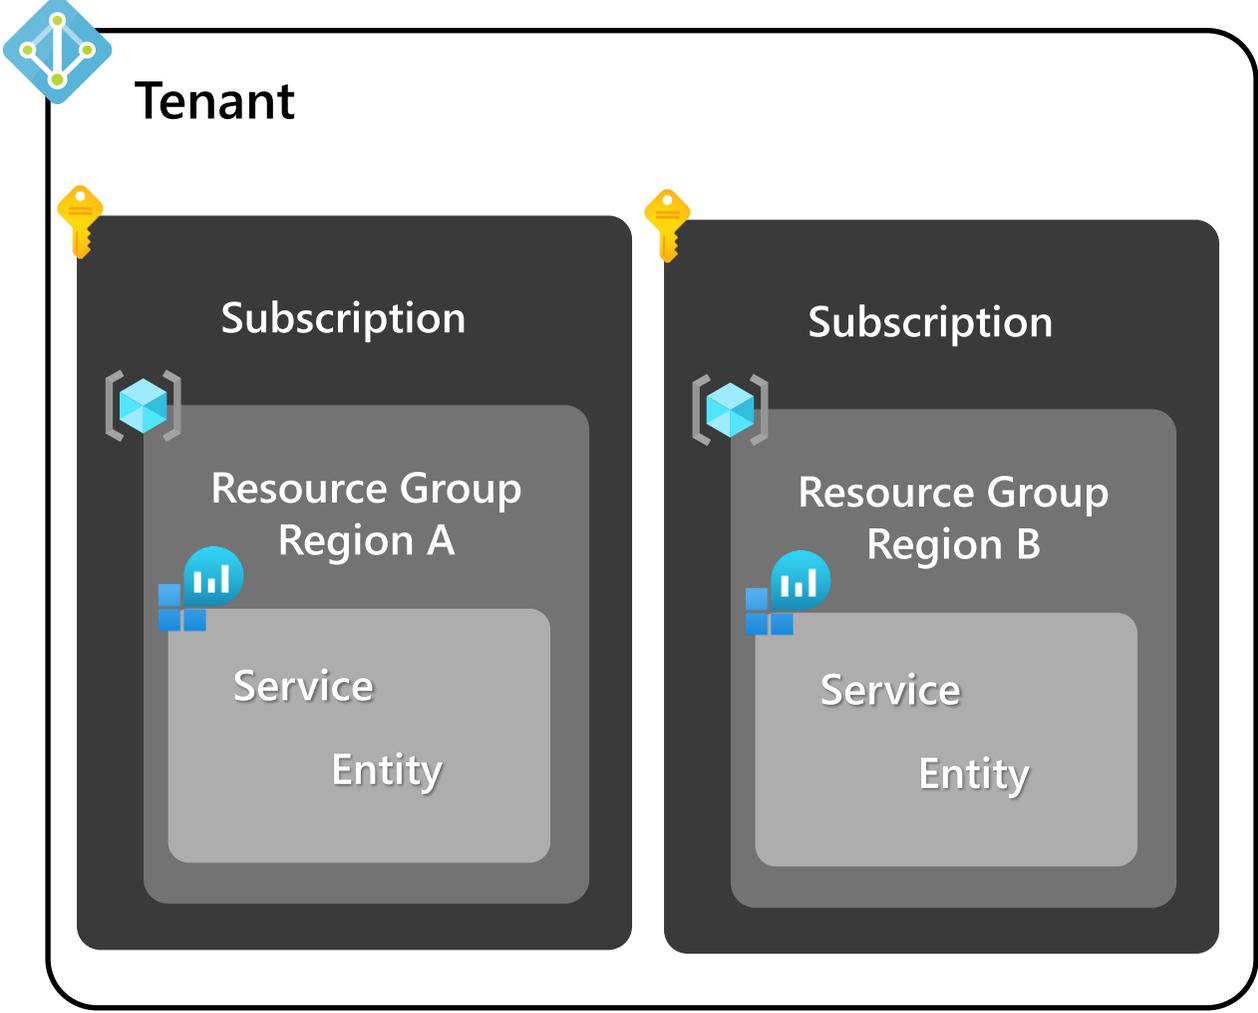

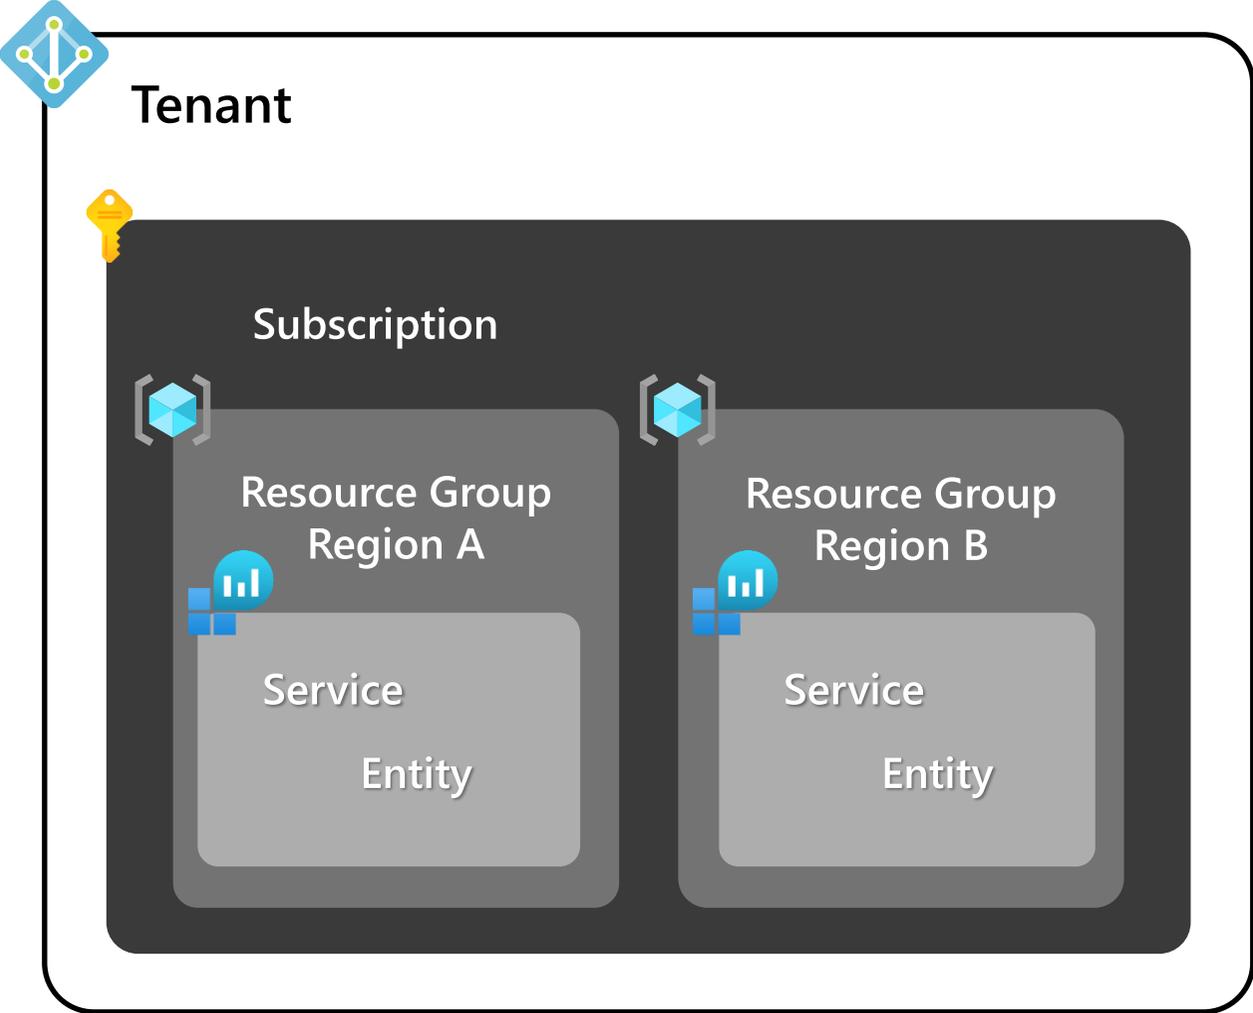

On Prem

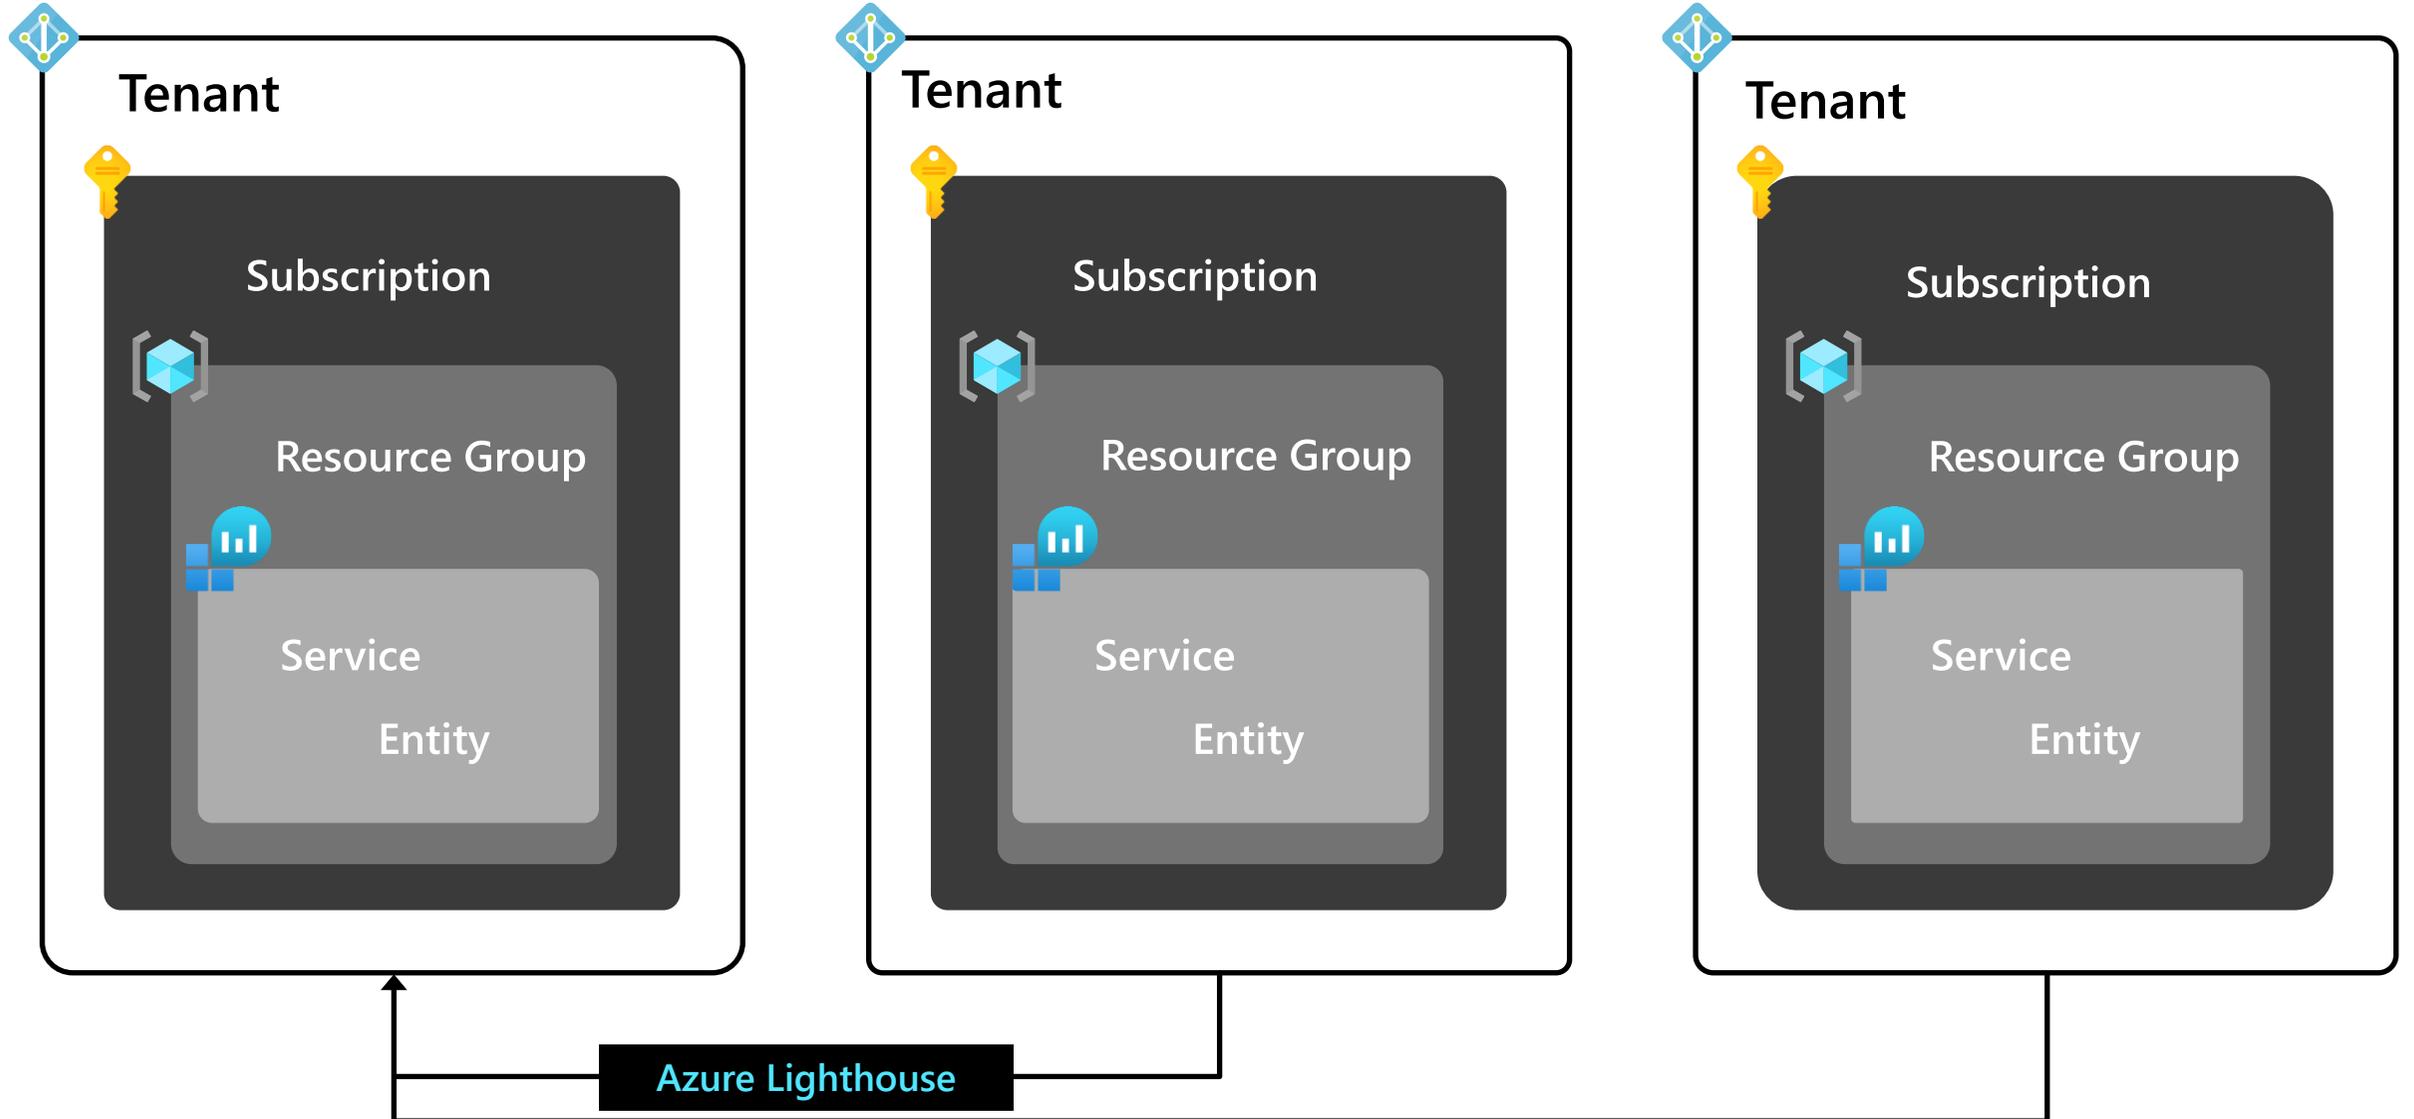

# Typical Single Tenant Design

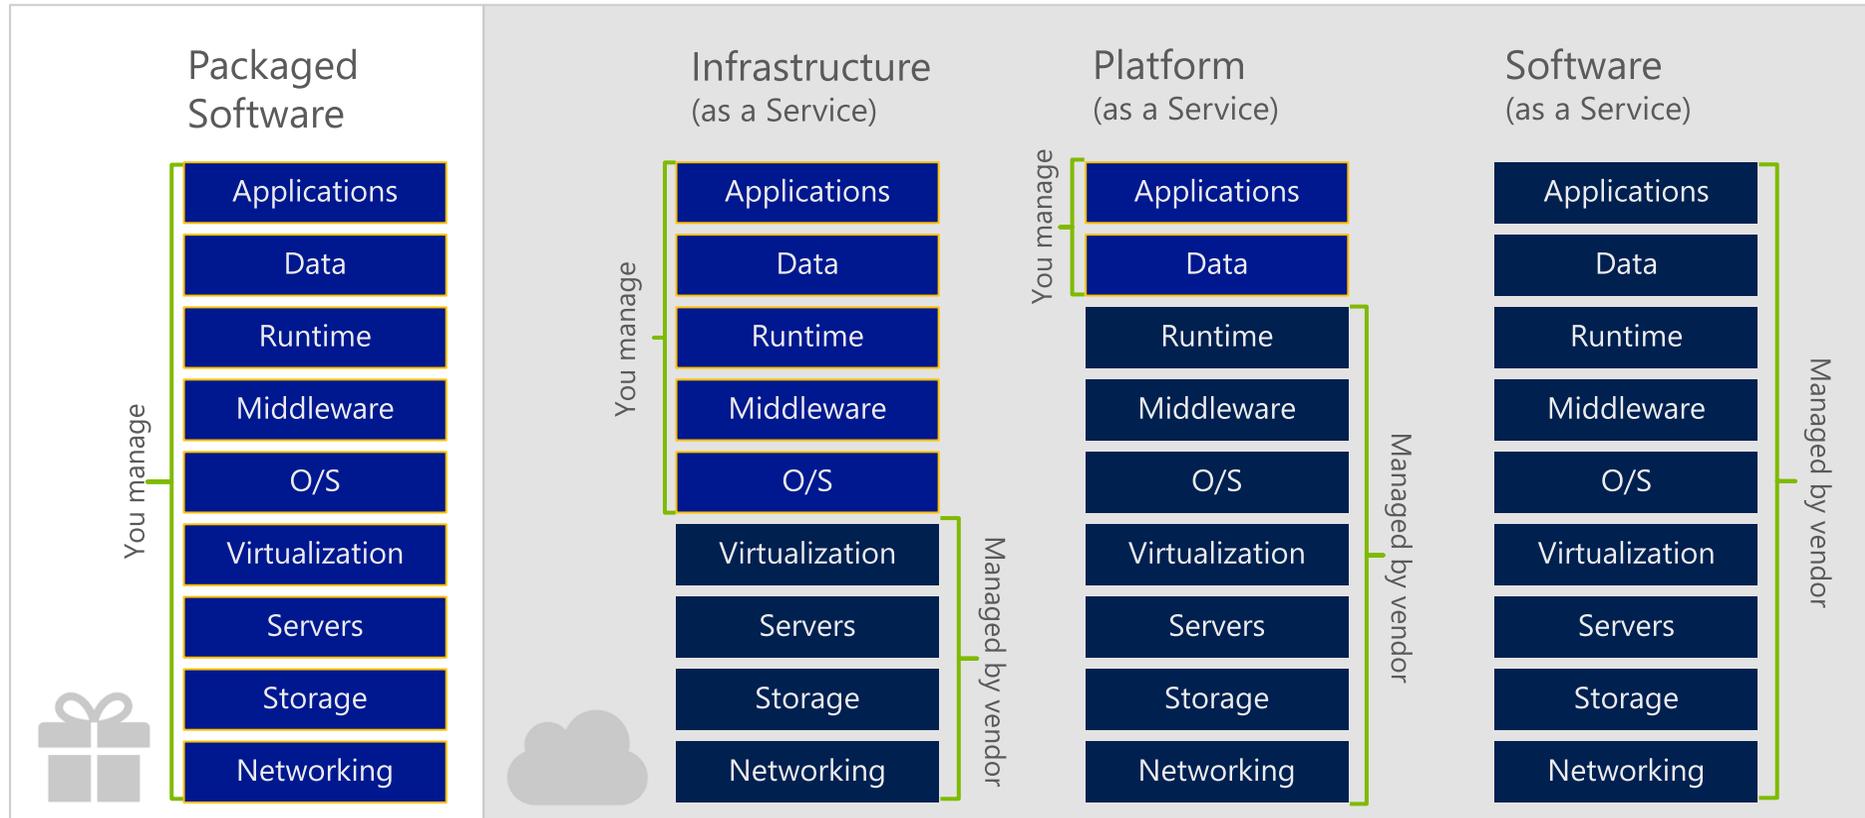

# Single Tenant Design

# Multi-Tenant Design

# Cloud Computing

## Platform Services

### Security & Management

- Portal
- Active Directory
- Multi-Factor Authentication
- Automation
- Key Vault
- Store / Marketplace
- VM Image Gallery & VM Depot

### Compute

- Cloud Services
- Service Fabric
- Batch
- Remote App

### Web and Mobile

- Web Apps
- API Apps
- API Management
- Mobile Apps
- Logic Apps
- Notification Hubs

### Developer Services

- Visual Studio
- Azure SDK
- Team Project
- Application Insights

### Hybrid Operations

- Azure AD Connect Health
- AD Privileged Identity Management
- Backup
- Operational Insights
- Import/Export
- Site Recovery
- StorSimple

### Integration

- Storage Queues
- Biztalk Services
- Hybrid Connections
- Service Bus

### Analytics & IoT

- HDInsight
- Machine Learning
- Data Factory
- Event Hubs
- Stream Analytics
- Mobile Engagement

### Data

- SQL Database
- SQL Data Warehouse
- Redis Cache
- Search
- DocumentDB
- Tables

### Media & CDN

- Media Services
- Content Delivery Network (CDN)

## Infrastructure Services

### Compute

- Virtual Machines
- Containers

### Storage

- BLOB Storage
- Azure Files
- Premium Storage

### Networking

- Virtual Network
- Load Balancer
- DNS
- Express Route
- Traffic Manager
- VPN Gateway
- Application Gateway

Datacenter Infrastructure (42 Regions, 36 Online)

# Licensing Azure

# Azure purchasing options

Direct on  
azure.microsoft.com

## Pay As You Go

Zero upfront cost, cancel anytime.

No long-term commitment.

Purchase with credit card.

Cloud Solution Provider  
Program

## White Label

Set the price, the terms and directly bill customers.

Directly provision and manage subscriptions.

First point of contact for customers needs.

Purchase through Distributors.

# Estimating Azure costs

No up-front costs. Pay only for what you use.

Note: Prices on the calculator do not include variations by region. To see prices for a specific region, please go to the individual service [pricing pages](#) and select the region.

Different cloud pricing models?

Azure = Consumption

365 = PU/PM flat

Azure Partner IUR

# Details

- Partners received free monthly Azure credits as part of their benefits
- Credits automatically renew each month.
- What are my IUR benefits? - <https://partner.microsoft.com/en-us/membership/internal-use-software>

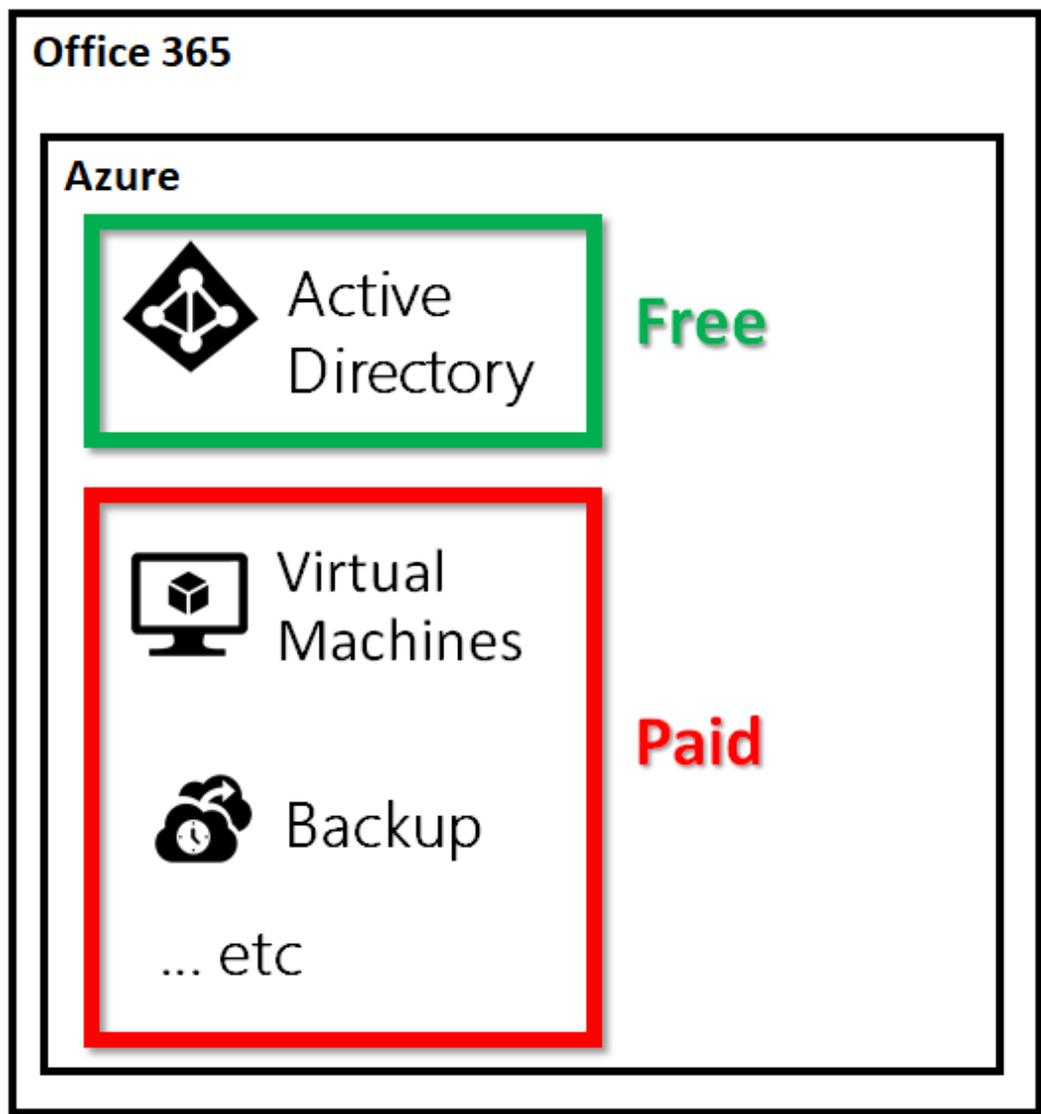

# What can you use your credits for?

- Hosting your customers DNS records
- Creating a cloud administration workstation
- Backing up local files
- Storing tools, ISOs, installation files, data in cloud
- Archiving data
- Migration location
- And much, much more

Using Azure

  
Paid Azure  
Subscription

# Azure DNS key features

## All common DNS record types

A, AAAA, CNAME, MX, NS, SOA, SRV, TXT

## Fast and available

Ultra-low query latency from global Anycast network of name servers

Fast propagation of new records, globally distributed

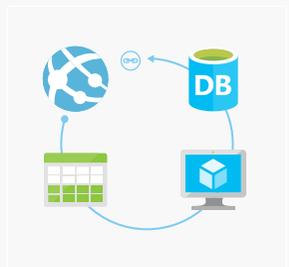

## Azure Resource Manager benefits

Security, role-based access control, tagging and template-based deployment

For both zones and record sets

## Automate via PowerShell

Ability to automate deployment using PowerShell

# Your Estimate

Azure DNS

1 hosted DNS zones, 1 DNS queries

\$1.24

# Key Azure scenarios for small & midsize customers

## Data Backup

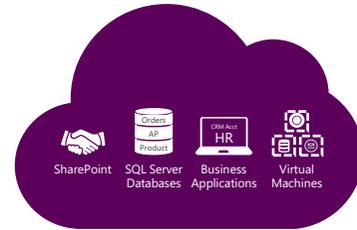

Provide easy, scalable data backup services in the cloud

## Disaster Recovery

Offer peace of mind with ongoing cloud-based DR services

## Deployment in VMs

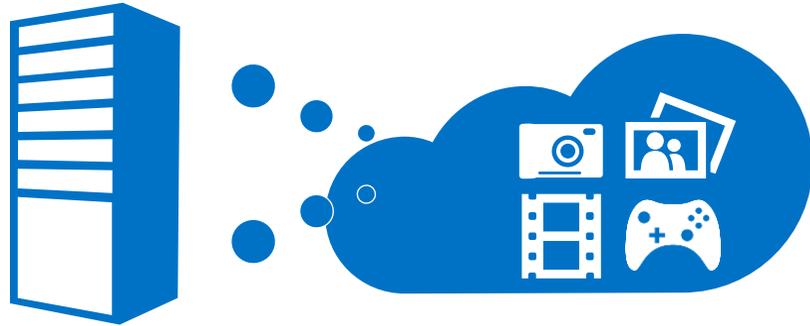

Quickly deploy and manage customer applications in the cloud

## Host Websites

Grow your business helping customers move their websites to the cloud

# Selling server backup in the cloud

## Provide easy, affordable backup and archival in the cloud

- Sell Microsoft Azure Backup as an ongoing service with a recurring revenue stream
- Quickly and easily provision more storage for your customers as needed

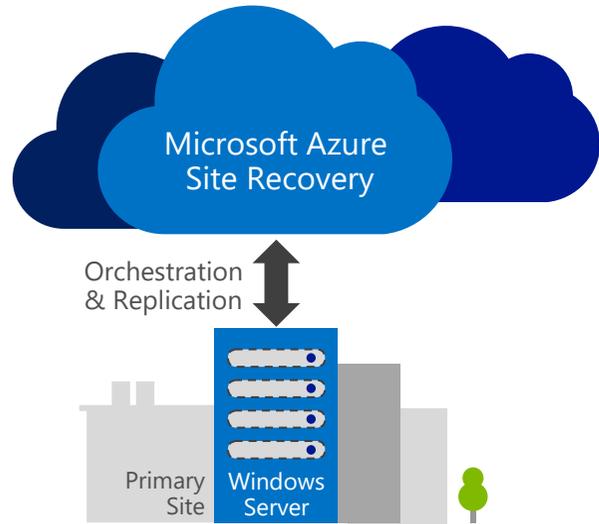

A range of applications: file servers, SQL Server, etc.

Long-term retention to address legal discovery needs

Encrypted backups and global, geo-redundant datacenters

No hardware and backup media costs—and no restoration costs

# Selling disaster recovery in the cloud

## Sell powerful, affordable, and simple disaster recovery (DR) in the cloud

- Offer your SMB customers peace of mind with cloud-based disaster recovery
- Use Azure as your DR site and leverage automated workload recovery

Earn recurring revenues by offering disaster recovery as a service (DRaaS)

Avoid the massive capital expense of building your own DR infrastructure

Provide site deployment in minutes, remote DR health monitoring, and customizable recovery plan

Deliver an initial DR plan and then offer ongoing testing and reporting services

# Storage, backup, and disaster recovery: how they work together

## Storage

Get easy, economical storage that can scale as needed

- Scale up or down easily to meet changing needs
- Access your data from anywhere
- Use with a choice of operating systems

## Backup

Get fast, simple backup and an easy way to restore lost files

- Backup files to a secondary location
- Quickly restore files when accidentally deleted or lost
- Retain files and data for legal requirements

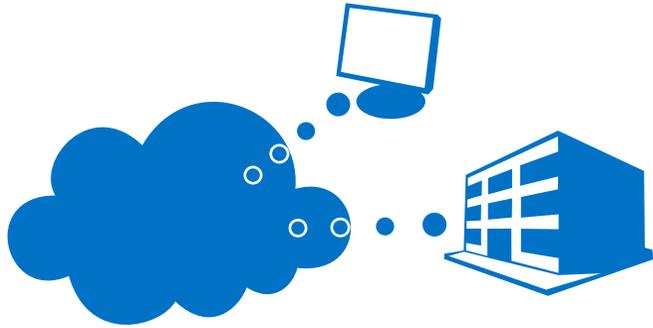

## Disaster Recovery

Protect your servers and get your systems back online quickly

- Keep a replica of the entire server infrastructure—updated in near real-time
- Get applications and services back up and running in minutes

# Hosting websites in the cloud

Grow your business helping customers move their websites to the cloud with Microsoft Azure

- Quickly build, deploy, and manage websites on an open and flexible cloud platform
- Offer the peace of mind from hosting on a global network of Microsoft-managed data centers

Leverage a fully-managed cloud infrastructure that can scale as needed to support the largest peak loads

Manage your customers' websites using the same familiar tools across on-premises and cloud environments

# Where to start

- I finally 'get' Azure - <http://blog.ciaops.com/2014/04/i-finally-get-microsoft-azure.html>
- Azure Desktop Backup - <http://blog.ciaops.com/2014/12/azure-desktop-backup.html>
- Azure Backup for Applications – <http://blog.ciaops.com/2016/01/azure-backup-server-for-applications.html>
- Creating an Azure DC – <http://blog.ciaops.com/2015/07/creating-domain-controller-in-azure.html>
- Azure Resource Manager Basics - <http://blog.ciaops.com/2016/02/azure-resource-manager-basics.html>
- Creating an Azure SMB File Share - <http://blog.ciaops.com/2016/01/creating-azure-smb-file-share.html>
