DICKER DATA SERVICES

NETWORKING STAGING SERVICES

Upsize your technical resources by utilising our team of specialists for your networking configuration services.

Dicker Data provides a comprehensive range of configuration services for networking equipment including switches, routers, access points and firewalls.

We ensure that equipment is ready to deploy into a production environment efficiently and cost-effectively. All equipment is provisioned, configured and tested prior to arrival on site, which allows for immediate installation and reduced engineering time on site.

Our services increase your capabilities and scale, through flexibility in service customisation. We utilise the latest automated deployment tools to enhance productivity and ensure consistent quality control, from a single unit configuration to large-scale rollouts of thousands of devices.

Staffed by a team of full-time network engineers, we have the knowledge and experience to support your staging and configuration needs.

SPEEDY DEPLOYMENT

You will reduce your operational costs and the time it takes to deliver to your Customer. This frees up your internal resources to focus on other tasks.
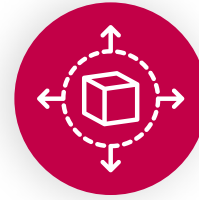

MINIMISE RISK OF DOA

We power on devices to minimise DOA upon arrival at site.

EXPAND CAPABILITIES

By leveraging our staging services, you can increase your offering, providing value to your Customers without needing to invest in fixed resources.

SCALE UP YOUR OPERATIONS

We provide you with the ability to respond to large tender requests. From item level customisation through to the rollout of thousands of devices.

NETWORKING CORE SERVICES

Wireless Access Point	• Power on self test • Upgrade or downgrade of the IOS • Print and apply host name label	**DDS-NET-WAP**
Phones	• Power on self test • Upgrade or downgrade of the IOS • Application of customer supplied configuration	**DDS-NET-PHO**
Switches & Routers	• Power on self test • Integration of hardware components • Upgrade or downgrade of the IOS • Application of customer supplied configuration	**DDS-NET-SWR**
Firewalls & Data Centre equipment	• Power on self test • Integration of hardware components • Upgrade or downgrade of the IOS • Application of customer supplied configuration	**DDS-NET-FWDC**
Unified Communications (UC) Custom Scope	• Update firmware • Connect and pair devices • Installation of MS Teams or Zoom • Start up verification	**DDS-UC-SPEC**
Custom Configuration	From small, one-off networking projects to large-scale, multi-device rollouts we can create a custom solution to meet the specific requirements of the project. We have extensive experience in full system testing and offer remote access to your requirement for validation prior to dispatch.	**DDS-NET-SPEC**

ADDITIONAL SERVICES

Asset Tagging & Reporting	**DDS-GEN-ASSETTAG**
