

DICKER

DATA SERVICES

Dicker Data Services operates an industry leading staging centre and secure warehouse to support partners in the deployment of production ready IT equipment. Whether it's a large-scale project or BAU, our team can assist with the staging of devices, storage, project coordination, and supply chain support. With years of experience and the resources required for successful project deployments, we're here to support your business growth.

Why use Dicker Data Services?

The Dicker Data Services team help partners grow revenue, increase profits and optimise their supply chain. The ability for our partners to be flexible and agile in response to changing situations is more important than ever. We offer integrated services across device staging, project coordination, and secure storage, to deliver commercially competitive turn-key solutions.

GROW REVENUE

We make the complex, simple. Expand your business by offering a full range of services.

INCREASE PROFIT

Our economies of scale and consumption-based pricing results in very competitive pricing.

SUPPLY CHAIN OPTIMISATION

We provide the operational capabilities to increase your agility and minimise risk.

Our team is an extension of your team

WE VALUE YOUR BRAND

We put your Brand at the forefront of every project we support you to deliver. We understand that your success is our success.

TEAMWORK

Your team and our team working together to deliver outstanding projects for your customers.

QUALITY

Our experts can help determine the best solution whilst delivering a consistent, dependable, high-quality service.

COMPETITIVE PRICING

Whether it's a standard price list or customised quotes, we offer pricing and solutions tailored to your requirements.

SCOPING WORKSHOPS

Virtual or face-to-face workshops where we collaborate to design the optimum solution.
